

Part 2

Your Team-by-Team Premier League Guide...

The most profitable bets and reliable stats for you to cash-in on EVERY team!

www.FootballBettingData.co.uk

There will be over 70 ways to win on every Premier League game in the 2010/11 season. From the usual Match Result, Goalscorer and Correct Score bets... to 'stats markets' on Corners, Goals, Goal Times, Booking Points, Yellow and Red Cards and Shirt Numbers!

You can cash-in on all those markets and more – if you have the access to the right information. That's where the stats – and our unique Football Betting Data service – comes in.

This first part of your Team-by-Team Premier League guide contained the most profitable bets and reliable trends for the first 10 Premier League teams in alphabetical order from Arsenal to Liverpool. Broken down into the following areas: Goals, Corners, Bookings and Scorers...

This report contains the most profitable bets and reliable trends for the other 10 Premier League teams starting with Manchester City and ending with Wolves.

I have also included the Premier League averages from last season. You can compare the Team Stats to the Averages to see which teams have been performing above or below average in those areas.
